

AUTOMOTIVE INDUSTRY

We ship the inventory automotive customers need to optimize just-in-time production lines, and we provide 24/7/365 reliability.

READY. SET. OPTIMIZE.

Rely on the industry's largest fleet and network of agents to meet your delivery requirements and rigorous production deadlines.

Our ground fleet is equipped with on-board Qualcomm satellite tracking systems, and our online automated tracking system allows you to see the location of your shipment in real-time and down to the street-level, helping you plan for its arrival.

We also provide air freight and charter options when your delivery deadlines are tight. Our air network includes the top integrated and commercial service providers in the industry, giving you access to the most flights and fastest service possible.

International Support

Panther proudly serves locations worldwide. Valid documentation is crucial when managing international shipments to ensure uninterrupted supply lines and production.

We participate in the C-TPAT program and our drivers are ACE and FAST certified. Our compliance with these programs reduce our drivers' border clearance times to under an hour in most instances.

No matter where your network of suppliers are located, we provide seamless service, direct to your assembly line.

How Panther Helps

Recently a Tier 1 automotive supplier needed help meeting the production needs of a major automotive manufacturer.

Panther responded by managing more than 28 aircraft and 58 ground shipments within a period of just 3 days. The automotive manufacturer and its supplier were protected, and production was uninterrupted.
