

Oil, gas, and utility companies are critical to the economy and national security. We handle their critical and time-definite needs.

OIL, GAS, AND UTILITY SUPPORT.

Energy companies are critical to both the economy and national security. When it comes to transporting mission critical parts to a job site location, the leaders in the energy sector turn to Panther. Regardless of the mode of transportation (ground, air, and ocean), Panther offers a solution that will meet your time and service requirements.

Our entire ground fleet is equipped with Qualcomm's on board satellite tracking system. This system enables you to go to the Panther website and see the physical location of your shipment down to the street level and in realtime, helping you plan for its arrival.

Panther drivers are uniquely qualified to safely and securely handle your critical freight. Our drivers are certified to handle hazardous materials and chemicals, and ensure all legal and safety measures are in place to prevent any delays in transit.

Industry Services

- Ground Expedite and Hot Shots
- Flat Bed, Step Deck, and Oversized Loads
- Air Freight and Air Charter Options
- Air-Ride, Pads/Straps/Dollies, Lift Gates
- Validated and Temperature Control
- Transportation Protective Services

How Panther Helps

When logistics is a problem, look to Panther for a solution. Recently, one of the world's largest oil companies needed a helicopter gear box shipped to Halifax, Nova Scotia in less than 24 hours. The closest gear box was located in Stavanger, Norway. Panther quickly identified the most cost-effective route and successfully delivered the critical part early, avoiding unscheduled down-time and millions of dollars in lost productivity.

Elite Services

When you have special handling needs, ask about Panther Elite Services, a next-level offering from Panther. Call 866.455.8204.
